

Method

- Put some small world toys (cars, dinosaurs, superheroes) in a container filled with water.
- Put your container somewhere really cold like the freezer or in your garden if it's freezing.

Ice Excavation Fun

Tools

You can even use pipettes, syringes or bottles filled with water.

Cool Film!

Watch these handy tips on how to rescue dinosaurs from ice by **redtedandpip**.

<https://www.youtube.com/watch?v=iE FY6PGL-x8&feature=youtu.be>

Experiment

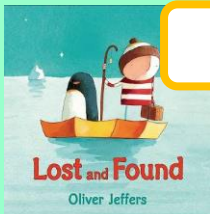

You can freeze toys in plastic gloves or balloons too!

Talk

- Can you **predict** how to make ice?
- Talk about **how the ice feels**.
- How does ice **feel different** to water? What **changes** do you notice?
- How can you turn the ice back to water?
- What **tools** could you use to **rescue** your toys?
- **How might the toys feel** when they are trapped and also once they are rescued?
- **Make up a story** about your rescue mission!

Story
